

HOW TO CONVERT YOUR BIRDS TO PELLETS?

Using the alternate-day method

YOUR
BIRDS
AT
THEIR
BEST

Making the switch to extruded pellets is an excellent way to keep your birds in top condition. Switching to the all-in-one nutrition is also pretty easy. Just follow our **step-by-step guide**.

In **2 big steps**, you'll have your favourite birds **enjoying NutriBird pellets** in no time.

STEP 1 THE INTRODUCTION

Use a familiar bowl and mix the usual seed mix with pellets.

UP TO 2 WEEKS

Why is this introduction needed?

This helps your bird familiarise itself with its new type of nutrition. For smaller bird species, this may take up to 2 weeks. Larger birds may immediately take to their new nutrition.

As soon as you notice your bird eating pellets, you can **go to step 2**.

STEP 2 THE ACTUAL CONVERTING

Using a familiar feeding bowl, offer pellets daily. Your bird is already familiar with the new type of nutrition. Now, you'll want to convert them completely.

Next to the pellets, occasionally add the old familiar seed mix in a separate but unfamiliar bowl. Do this to make sure your bird still eats everything. Don't force your bird to eat pellets from day one. Gradually increase the days without their familiar seeds.
